Gameplay programmer with 4+ years shipping AAA and indie titles in C++, specializing in camera systems tightly coupled to combat, player controls, cover mechanics, and interaction systems, built on data-oriented frameworks.

EXPERIENCE

Gameplay Programmer, IO Interactive

Jul 2023 – Present

- Owned camera systems for 007: First Light in C++, systemic movement, combat cameras (ranged/melee), cover assists, and transition systems built on a data-oriented framework using the in-house Glacier engine, interfacing with systems like combat, locomotion, and cover systems in real time.
- Designed and shipped gameplay features end-to-end with design, cinematic arts, UI and engine teams.
- Maintained performance targets through ongoing profiling and optimization on a shipped AAA title.
- Improved team productivity through build tooling, new debug systems, and mentoring.

Software Engineer, Taleworlds Entertainment

Feb 2022 – Jun 2023

- Shipped gameplay systems in C++ and C# for Mount & Blade II: Bannerlord such as new quests, perks, retirement, statistics, and modding support within the in-house engine.
- Increased integration test coverage and participated in code reviews using Plastic SCM and JIRA.
- Collaborated with design, engine, UI, and art teams to iterate on new gameplay ideas and systems.

Audio Software Engineering Intern, Treyarch

May 2021 – Aug 2021

- Extended vehicle sound systems in C++ for the Call of Duty engine; designed and pitched a multiplayer mode using the studio's proprietary scripting language.

Software Engineering Intern, Taleworlds Entertainment

Jun 2020 – Aug 2020

- Developed gameplay features, modules, systems, and tools for Mount&Blade II: Bannerlord.
- Designed and implemented the first performance benchmark scene prototype, now shipped in the game.

EDUCATION

University of Southern California, M.S. Computer Science

2019 – 2021

- Fulbright Master's Scholar, 1 of 70 selected from the Fulbright Türkiye cohort of 2019

Bahcesehir University, B.E. Computer Engineering & B.S. Genetics and Bioinformatics

2014 – 2019

- Erasmus+ exchange participant at University of Hertfordshire, UK (2017) and TU Berlin, DE (2018)

PROJECTS

The Trials of Snowshoe Thompson

2020 – 2021

- Managed the audio production pipeline from sound design through gameplay implementation.
- Programmed all SFX, music, and mixer implementations in Unity with C#.

Liquidators 96% Positive on Steam

2019 – 2020

- Led level design and iterated on encounter pacing for a shipped indie title built in Unreal Engine 4.
- Mentored teammates on engine workflows.

ADDITIONAL INFORMATION

- Technical Skills:** C++, C#, Data-Oriented Design, Multithreaded Systems, 3D Math, Game Engine Architecture, CMake, Bash, Git, Perforce, Plastic SCM, Console Development, Tracy Profiler, Unreal Engine 4, Unity, FMOD, Blender, Substance, JIRA, Agile, Visual Studio, Lua, Python
- Languages:** Turkish (Native), English (Fluent), German (Basic), Spanish (Basic), Polish (Basic)
- About Me:** Got my bicycle crushed by a tank, backpacked alone through Spain, visited Chernobyl Nuclear Power Plant, played over 10,000 hours of video games
